

DeltaTray Plus+ is a heavy duty, shower tray former designed and manufactured for use where the application of vinyl floor coverings is required. DeltaTray Plus+ is an extremely hard wearing and robust shower tray former specifically designed for use in bathing environments where mobility aids and point loading will be prominent.

DeltaTray Plus+ is manufactured to suit individual specifications. The structure of the DeltaTray Plus+ comprises of a rigid insulating core with a high density impact resistant cement particle board laminated to the surface. The composite elements are further reinforced with a factory applied cementitious screed. The specially prepared shower tray formers are manufactured to order.
